**************************************************************************************NEW AUDITING SOFTWARE**************************************************************************************

A new version of the Texas Landscape Irrigation Auditing Software is now available. The upgraded software is now online based so you can use it on any operating system or smart device and receive updates automatically. This software is only available to those who have completed the Landscape Irrigation Auditing & Management Course. To check eligibility and begin using the new software, visit http://LIA.tamu.edu/update

************************************************************************************** ONLINE COURSE**************************************************************************************

Electrical Troubleshooting For Landscape Irrigation Systems (8 Hours*)
Register at http://irrigation.tamu.edu/online.php

**************************************************************************************

EPA WaterSense Irrigation Auditor Certification**
Students who complete the Landscape Irrigation Auditing & Management short course after January 1, 2011 are now eligible to become EPA WaterSense Certified Irrigation Auditors. To become certified, a student must register and pass the AgriLife Extension Irrigation Auditors Certification Exam. The auditor must then renew their certification within 2 years by completing 8 hours of continued education from the Texas A&M School of Irrigation and providing documentation of completing at least 1 irrigation system audit. For more information visit http://irrigation.tamu.edu/watersense.php
